

Turn Your Excess IT Equipment Into Working Capital

Leading IT Asset Disposition Services

Our Mission Is Simple

We provide best-in-class IT asset management services that help mid-to large-sized companies save money, streamline operations, and improve data security. Our comprehensive, compliant, and auditable solutions take the burden off of executives by securely destroying sensitive data and eliminating the risk of recycling liability.

How We Work

We help global companies unlock value from retired IT hardware while ensuring maximum data security and full e-waste compliance.

We begin every partnership by understanding your business goals, compliance requirements, and technology lifecycle needs. From there, we design and execute a tailored IT asset disposition strategy that prioritizes data security, regulatory compliance, and value recovery. Our team proactively manages each project from start to finish, ensuring seamless logistics, full auditability, and maximum return on your retired IT assets.

What We Do

We're proud to be recognized globally for leadership in secure data destruction, compliant e-waste recycling, and computer liquidation.

Auditable Data Destruction

Our comprehensive NAID AAA certified data destruction services ensure your company's sensitive information is completely protected through industry-leading standards and methodologies.

- **Hard Drive Shredding:** Complete physical destruction of hard drives, tapes, and recordable media
- **Data Erasure:** Data is erased from hard drives using specialized software that captures the process and provides electronic verification recorded to a secure database, following NIST 800-80 guidelines for media sanitization
- **Detailed Reporting:** Complete documentation of all storage media erased or destroyed

Our data destruction services can be performed onsite at your location or at Liquid Technology's secure facilities. All services are backed by Errors and Omissions and Cyber Liability Insurance.

Compliant E-Waste Recycling

Protect your company from steep fines and negative publicity with our responsible e-waste recycling and disposal services. We reduce your risk, ensure compliance, and protect the environment through proper handling of non-marketable assets. Our comprehensive approach includes adherence to all EPA, federal, state and local regulations with a strict no export and no landfill policy. As a fully insured e-waste recycler with ISO 14001:2015 certification for environmental management, we are audited annually to confirm all guidelines are met and that our partners are protected. All e-waste recycling services are backed by Pollution Liability Insurance for complete peace of mind and protection against environmental liability.

- **Disposal of all non-marketable IT assets**
- **Full regulatory compliance across all jurisdictions**
- **Environmental stewardship through responsible recycling practices**
- **Complete audit trail and documentation**

Resale of Technology Hardware

We purchase used computers and other IT equipment of all makes and models, including servers, networking equipment, desktops, laptops, storage, and GPUs. Choose between direct purchase with upfront offers and COD options, or consignment with tiered revenue share models.

- **Direct Purchase:** Upfront cash offers with cash-on-delivery options available
- **Consignment:** Tiered revenue share structure to maximize returns over time

With 25+ years of hardware resale experience and global coverage across North America, EMEA, APAC, and LATAM, we leverage extensive market knowledge to optimize pricing and demand for your specific equipment types.

As an R2v3 certified recycler, Liquid Technology:

- Passes annual 3rd-party audits
- Disposal of non-marketable assets
- Adherence to all EPA, federal, state, and local regulations
- No export and no landfill policy
- Pollution Liability Insurance

LT Portal
